

DSHS In-Depth County Profiles
Additional Information
08.12.12

Please add the following information to the attached in-depth county profiles regarding **Secondary Diagnosis of Mental Illness and/or Substance Abuse** (2006-2010):

Washington County
Congestive Heart Failure = 13.5%

Note on Profile Information: *There needs to be at least 150 hospitalizations, over the five year period (2006-2010) among county residents, to produce an in-depth county profile for any of the ten adult potentially preventable hospitalization conditions.*

For counties and/or conditions in which an in-depth profile was not provided (due to limited number of hospitalizations), I'd recommend you review the county profiles on <http://www.dshs.state.tx.us/ph>. Click on "County Profiles"

Adult Potentially Preventable Hospitalizations in Texas

Hospitalizations for the conditions below are considered "potentially preventable," because if the individual had access to and cooperated with appropriate outpatient healthcare, the hospitalization would likely not have occurred.

The purpose of this information is to assist in improving health care and reducing health care costs. This information is not an evaluation of hospitals or other health care providers.

Required Selections

Congestive Heart Failure (2006-2010)

Select Year(s): Select Condition(s):

Select County or Texas:

Congestive Heart Failure

- 2006
